

Martin Etmajer

TECHNOLOGY & PRODUCT LEADER | IT TECHNOLOGY STRATEGY & ENTERPRISE ARCHITECTURE AT BOEHRINGER INGELHEIM

Dipl.-Ing. Martin Etmajer, Coulinstraße 30/12/5, 4020 Linz, Austria

☎ +43 (0699) 11430886 | ✉ martin@etmajer.com | 🌐 metmajer | 📱 metmajer

“Simple things should be simple, complex things should be possible.” Alan Kay

Summary

Technology and platform leader with 15+ years of experience spanning software engineering, cloud-native architecture, platform engineering, and technology strategy. Proven ability to deliver measurable outcomes at scale, including 4x release throughput improvements, seven-figure process re-engineering savings, and a 90% reduction in compliance overhead in regulated environments. Equally comfortable setting direction at the strategic level and driving hands-on execution, with a consistent focus on simplicity, business and end-user value, enabling modern engineering practices, and accelerating time-to-market.

Deep expertise in cloud-native platforms and DevSecOps on major cloud ecosystems, spanning container orchestration, CI/CD toolchains, observability, and security. Combines hands-on architecture depth with structured governance experience as an Enterprise Architect in a Fortune 500 pharmaceutical company. Track record of strategic technology consulting and transformation, partner go-to-market execution, leading and mentoring international engineering teams, and founding and scaling cross-departmental communities of practice.

Work Experience

Boehringer Ingelheim

Global

CTO OFFICE & ENTERPRISE ARCHITECTURE BOARD

Jul. 2025 - PRESENT

- Leading *AI technology strategy* as part of a cross-functional core team. Designed a structured technology evaluation framework that brings together business and IT stakeholders to assess AI applicability across Boehringer's IT capability landscape and deliver a *prioritized, data-informed adoption roadmap*.
- Designing a *supplier governance framework* covering requirements definition, contractual integration, training and enablement, and ongoing monitoring to improve time-to-market, strengthen collaboration, and manage risk.
- Redesigned Boehringer's global *IT Change Management process* and automated what previously required *8 hours of manual effort per change*. The first wave covers *65% of all IT systems* and delivers *seven-figure annual labor savings*, with further rollouts planned.
- Secured approval from Global Quality and external auditors for a fundamentally re-engineered approach to *computer system validation* that reduces compliance overhead by *up to 90%*.

CIO ADVISORY

Oct. 2024 - PRESENT

HEAD OF IT PLATFORM PRODUCT & ENGINEERING

Oct. 2022 - Dec. 2025

- Repositioned Boehringer's *DevSecOps platform* as a strategic product enabling business and IT teams to turn ideas into compliant, production-ready solutions: expanded its scope to include a *component marketplace, management plane, unified UX*, and address new users including data engineers, data analysts, and data scientists, accelerating time-to-market for digital initiatives.
- Built a high-performing remote team of *15* through structured goal-setting, coaching, and continuous improvement, delivering *4x more major releases per year, 30x improved validation testing efficiency*, and reducing technical onboarding from *30 days to a few hours*.
- Drove platform adoption into *high-criticality GxP-regulated environments* by building partnerships with vendors and internal stakeholders, enabling regulated areas to leverage modern DevSecOps practices and reduce delivery times from *weeks to hours*.
- Founded an *internal conference* to evangelize the platform and drive adoption across business and IT, growing it to *800+ attendees* by its third edition.

PRODUCT LEADERSHIP COMMUNITY OF PRACTICE LEAD

Jan. 2023 - Feb. 2025

- Founded and led a *Community of Practice for Product Managers and IT Capability Leads*, with *100 members from 14 departments* in business and IT.
- Designed a curriculum of training, coaching, and mentoring to help members develop *from operational execution toward entrepreneurial ownership*.

- Defined the *target architecture* for a strategic, *cloud-native DevSecOps platform* serving diverse users, including software engineers, test engineers, IT system leads, and compliance experts, balancing flexibility with compliance requirements.
- Governed the *convergence of Boehringer's IT standards*, comprising both traditional and cloud-native platforms and tools, into a *unified, GxP-compliant continuous delivery process* that provides a *single path to production* for all new custom-developed and COTS systems.
- Co-founded the *IT Engineering Academy* to upskill practitioners on Platform-related processes and technologies through structured content, hands-on training, and a community of experts to reduce knowledge gaps and accelerate adoption.

LEAD TECHNOLOGIST & AGILE COACH AT CLOUD CENTER OF EXCELLENCE (CONTRACTOR)

Jun. 2018 - Jun. 2019

- Designed and facilitated a *one-week innovation workshop* for the newly founded *Cloud Center of Excellence* (15 members), establishing the team's vision, strategy, and operating model, accelerating time-to-first-MVP by aligning on architecture, priorities, and ways of working.
- Spearheaded the development of a *LEGO-esque architecture of small, reusable, and composable infrastructure-as-code building blocks* using open-source technology, including *Ansible and Terraform*, to facilitate self-service, improve quality, and decrease time-to-market.
- Coached the team in adopting *Agile, Lean, and UX practices*, introducing *User Story Mapping*, incremental delivery, and stakeholder communication to establish a user-centric delivery culture.

GitHub

OPEN SOURCE MAINTAINER AND CONTRIBUTOR

Jun. 2018 - PRESENT

- Created *dataseries.js*, a JavaScript library for generating arbitrary time series data to accelerate data visualization prototyping workflows.
- Co-maintained *terraform-docs*, a tool that transforms Terraform infrastructure-as-code configurations into human-readable documentation and continuous delivery pipeline-ready output formats. The project grew into a *community standard*, reaching *4,000+ GitHub Stars and 500+ Forks* by April 2024.
- Contributed to a range of high-profile open-source projects, including *d3.js.org*, *Homebrew*, *Kubernetes*, *kubicorn*, and *Linux-HA*.

GetCloudnative

Linz, Austria

FOUNDER & PRINCIPAL CONSULTANT

May 2018 - PRESENT

At GetCloudnative, we supported our clients in their journey to embracing their digital lives and bringing new and better products and services to the market quicker: from identifying and solving the right problems through innovative thinking and acting, backed by appropriate, modern technology to empowering teams to navigate the turbulence of change with confidence.

Dynatrace

Linz, Austria

SENIOR TECHNOLOGY STRATEGIST/LEAD AT INNOVATION LAB

Mar. 2014 - Feb. 2018

- Led strategic innovation initiatives to tame complexity in some of the world's largest software systems at a *15-year consecutive Gartner Magic Quadrant leader*, reporting directly to *C-level leadership*.
- Partnered with *Fortune 1000* customers and industry analysts at *Gartner and Forrester* to translate market signals into product direction. Developed technology partnerships and executed joint go-to-market strategies and with companies such as *Red Hat and Chef*, and evangelized *AI-driven observability* to global C-level audiences.
- Designed and scaled a *technical enablement program* for Dynatrace's global sales engineering community. Shared expertise broadly via *DevOps.com*, practitioner meetup groups, and international technology conferences including *QCon and Red Hat Summit*.

Smarter Ecommerce

Linz, Austria

SENIOR SOFTWARE ENGINEER

Sep. 2011 - Jan. 2014

- Developed innovative software products in *automated Pay-Per-Click advertising* with a focus on high-volume data cleansing and transformation, *data visualization*, and *data storytelling*.
- Drove engineering culture through regular *tech talks*, surfacing emerging trends and framing their practical applicability for the team.
- Mentored an international student at *Johannes Kepler University (JKU)*, Linz, co-supervising a *Master's thesis in data storytelling*.

StreamUnlimited

Vienna, Austria

SYSTEMS AND SOFTWARE ARCHITECT

Jul. 2006 - Jul. 2011

- Requirements elicitation, architecture, and engineering for global enterprise customers in the *automotive, consumer electronics, and health-care industries*, including *Bang & Olufsen, Hitachi, and Philips Speech Processing*.
- Co-architected a high-availability recommender system for Springer Publishing, combining high-performance search engines, highly optimized database query design, and machine learning via collaborative filtering to deliver personalized content at scale.
- Introduced *Continuous Integration* practices to the organization's software development lifecycle, improving software quality and reducing reliance on manual testing.

Education

Vienna University of Technology

MSc. IN COMPUTER ENGINEERING / DIPL.-ING. IN TECHNISCHE INFORMATIK (GRADUATED WITH HONORS)

Vienna, Austria

Oct. 2004 - Feb. 2011

Languages

German Native proficiency

English Full professional proficiency

Training

Train the Trainer - Training and Workshop Facilitation Bootcamp

Indiálogo, Barcelona

Apr. 2019 - May 2019

Software Product Management

University of Alberta

Aug. 2016 - Jul. 2017

Recommendations

Günter Schramm

Aug. 2018

DIRECTOR TECHNICAL CUSTOMER SUPPORT, DYNATRACE

"I had the pleasure to work with Martin during his time at Dynatrace. My team regularly consulted with him on business-relevant cloud-native and microservices technology, such as Red Hat OpenShift and Kubernetes. Together with Martin, we've developed a training program to help our globally distributed teams embrace these emerging technologies – and knowing how much professionalism Martin puts into his work, it comes as no surprise to me that his training concepts and material have remained in high demand ever since. Martin has this rare ability to understand complex technology in all its depth, and explain it to others in a simple and understandable way. It's that combination that makes him an extraordinary enabler and technology evangelist."

Chris Morgan

Mar. 2018

VICE PRESIDENT, HYBRID PLATFORMS CUSTOMER & FIELD ENGAGEMENT, PARTNER PRODUCTS EXECUTIVE, RED HAT

"While I was at Red Hat and Martin was at Dynatrace, I had the good fortune to work with him as a partner for close to 3 years. During that time, Martin's responsiveness, attention to detail, technical and business awareness of the partnership details helped to revive and expand the work between our two companies. Regardless of the situation, I knew that Martin would be able to offer insight and guidance to move things forward."

Dr. Peter Putz

Feb. 2018

OPERATIONS LEAD, DYNATRACE INNOVATION LAB (PREVIOUSLY A SENIOR MANAGER, NASA)

"While working as a Senior Technology Strategist with the Dynatrace Innovation Lab Martin distinguished himself as a technical visionary and business strategist. As an outstanding expert in CI/CD and cloud technologies he was at the forefront of scouting, assessing and adopting rapidly emerging technologies to advance the Dynatrace industry leading monitoring solution. He was key in establishing strategic alliances with global cloud providers and successfully lead go-to-market efforts by bringing together cross-functional and globally distributed teams. His diligence and keen sense of technological advancements made him a well respected player within the cloud community."

Ao. Univ. Prof. Dr. Johann Blieberger

Apr. 2010

AUTOMATION SYSTEMS GROUP, INSITUTE OF COMPUTER AIDED AUTOMATION, VIENNA UNIVERSITY OF TECHNOLOGY

"I have known Martin for a year as his Professor. My group has been closely involved with Martin during his studies. Martin is a dedicated and very talented student. He is quick to grasp new and complex technical concepts. His practical work experience helps him find creative ways of solving technical problems in the most efficient way. This makes Martin a truly exceptional student. His analytical skills are excellent: he is able to simplify technical theories and present them to non-technical people, in a clear and understandable way. Comfortable presenting, he has a natural ability to engage and connect with his audience. A strong team player, I would not hesitate to hire him for one of my academic work groups."
